

On-Site Service for an Enhanced Wellness Experience

In addition to offering on-line services to increase coverage, Advanced Care Wellness prides itself in direct, on-site service that boosts engagement and quality delivery.

When possible, on-site services enhance program quality on a variety of levels:

- **Personal interactions.** Engaging with employees in their environment, listening to their needs, and offering personalized health coaching at the point of care provides an unprecedented level of service.
- **Opportunities to reach employees in all divisions.** Depending on departments, many employees may not be in a position to do an on-line HRA, check email for health information or visit a wellness portal. This is especially true in industries of manufacturing, oil field work and agriculture. An on-site presence allows Advanced Care Wellness to meet employees on their terms, when and where it is best for them.
- **Improved utilization.** When wellness programs are offered on-site, employees are reminded of the service, co-workers increase the accountability and the convenience allows for greater engagement.
- **Confidential conversations.** Advanced Care Wellness maintains strict confidentiality at all times, regardless of the service being provided. Many employees may be hesitant to enter personal information into a website. In this case, speaking with a healthcare professional in person would be the best option for them. Our team offers customized, personal health coaching at the point of care for each employee.
- **Seamless continuum of care.** By offering a blend of on-line service with on-site, Advanced Care Wellness is a unique single provider of services. From on-line webinars, education and health assessments, to on-site events such as health screenings, vaccinations, wellness challenges and more, we offer seamless delivery, care and convenience.

For more information on the benefits of on-site wellness services or a free consultation, contact Advanced Care Wellness today. Sean Kenny, Health and Wellness Manager at (661) 716-7118 Or email: sean@advancedcarewellness.net.
